## Maritime & Logistics (PGDM-ML)

**“**This future-ready program blends foundational maritime management, Logistics and Supply Chain mastery with advanced analytics and AI technological skills. Designed for the global blue economy, it equips students with specialized training in shipping networks, commercial chartering, logistics, supply chain and international trade operations while ensuring Day-1 readiness for high-stakes roles in logistics, port and terminal management. **”**

## About IITDM Vizag

International Institute of Technology, Design and Management, Visakhapatnam (IITDM Vizag), is an AICTE-approved autonomous business school and a Business Education Alliance Member of AACSB, as well as a member of AMBA-BGA. The Institute is committed to excellence in education, research, and innovation across the fields of technology, design, and management.

Located on a sprawling 34-acre, Wi-Fi-enabled green campus in the vibrant city of Visakhapatnam, Andhra Pradesh, the Institute offers a sustainable and enriching learning environment.

IITDM Vizag delivers a comprehensive and dynamic education for aspiring business leaders through its cutting-edge Post Graduate Diploma in Management (PGDM) programmes. These two-year programmes, with specialisations in Business Analytics with AI, Aviation & Logistics, Maritime & Logistics, and Financial Services (with a major in Financial Inclusion), seamlessly blend theoretical knowledge with practical applications to prepare students for today's fast-paced global business environment.

## Programmes Offered by IITDM Vizag

### Long-Duration Programmes

**PGDM in**  
Business Analytics with AI

**PGDM in**  
Aviation & Logistics

**PGDM in**  
Maritime & Logistics

**PGDM in**  
Financial Services

### Short-Duration Programme

- ▶ Centre for Drone and Aviation Management
  - Hands-on experience and DGCA-certified drone pilot training

## About the Programme

The PGDM in Maritime & Logistics offers a unique interdisciplinary curriculum that bridges the gap between traditional maritime operations, logistics, supply chain and new-age digital transformation. The curriculum is built to address the complexities of logistics, supply chain, EXIM trade, port management, commercial shipping, chartering markets, and legal principles governing the shipping business.

A core differentiator is the **Start-up Founder Program (SFP)**, which is deeply embedded in the course grid to foster an entrepreneurial mindset from the first semester. Students gain access to a **₹1 Crore startup seed fund assistance** to transition from maritime students to logistics tech founders. The program also places a heavy emphasis on **Environmental Integrity and Social Responsibility**, preparing leaders to navigate global climate shifts and lead "Green Operations" within the maritime industry.

## Curriculum

The detailed curriculum will be announced shortly and will be aligned with industry requirements and regulatory frameworks.

## Who Should Apply

This programme is ideally suited for individuals aspiring to develop into responsible leaders capable of creating meaningful impact in today's dynamic business environment.

- ▶ Demonstrated academic, professional, or extracurricular excellence
- ▶ Readiness to thrive in a rigorous and immersive learning environment
- ▶ Distinct perspectives and experiences that enrich peer learning and classroom discussions

## Programme Overview

The curriculum follows a structured Learning Roadmap that transitions students from foundational concepts to expert applications:

Students begin with certifications in Prompt Engineering for Generative AI, Python, and SQL to ensure they can manage tech-driven logistics data. Intensive modules cover International Trade & EXIM Documentation, Logistics and Supply Chain mastery with advanced analytics and AI technological skills, Laws of Carriage of Goods by Sea, and Maritime Insurance. Advanced coursework includes Ship Scheduling, Berth Allocation, Port Operation, and Shipyard Management. Managers are trained in AI/ML applications and Data-Driven Decision Making specific to maritime & logistics. Graduates are prepared for executive roles such as Maritime Logistics Head, Port Terminal Manager, and Shipping Operations Manager at global firms like Maersk, Adani Ports, and DP World etc.

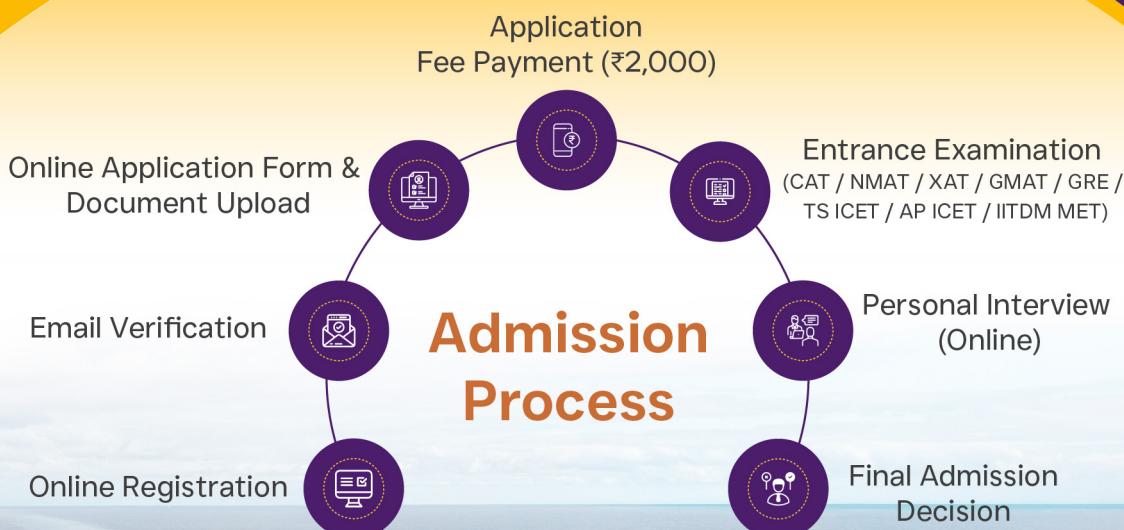

Mode of Study:	Day-Classroom
Break-up of Credits:	To be announced
Duration:	22 Months
Total Number of Sessions:	700+
Programme Commencement:	June 2026
Summer Internship:	Included
